

Professional Summary

Seeking an entry-level role in AI/ML to start my career in a professional environment. AI/ML undergraduate skilled in Python, TensorFlow, Scikit-learn, and deep learning fundamentals. Experienced in developing machine learning models and embedded IoT applications through academic projects and internships. Interested in Machine Learning, Generative AI, and MLOps.

Technical Skills

Version Control	- Git, GitHub, VS Code
Programming Languages	- Python, C++, SQL
Machine Learning	- TensorFlow, PyTorch, Scikit-learn
Data Analysis	- Pandas, NumPy
AI Technologies	- Clustering, Neural Networks, Deep Learning
Operating Systems	- Linux

Projects

Google Play Store Application Rating Prediction: A Comparative Study of Machine Learning Models

Tech Stack: Python, Scikit-learn, Pandas, Gradient Boosting, SVM, AdaBoost, Random Forest

- Developed a machine learning model to predict Google Play Store application ratings using app metadata such as reviews, installs, category, and size.
- Performed data preprocessing, feature engineering, and exploratory data analysis on Play Store dataset.
- Compared multiple machine learning algorithms including Gradient Boosting, SVM, AdaBoost, and Random Forest.
- Built a Gradient Boosting model on Google Play Store dataset with **94.12% prediction accuracy** after preprocessing and feature engineering on 10k+ records.
- Conducted model evaluation and statistical analysis using IBM SPSS for performance comparison.

Internship Experience - Embedded Engineer Intern

Skill Forge Solutions Pvt Ltd | Bengaluru, Karnataka

MAR 2025 – MAY 2025

- Developed embedded applications using Arduino, STM32, and Embedded C/C++.
- Interfaced DHT11, IR, and Ultrasonic sensors with microcontrollers.
- Worked with UART, SPI, and I2C communication protocols.
- Built IoT-based home automation and obstacle avoidance robot prototypes.

- Performed hardware debugging, firmware testing, and sensor calibration.
- Used Arduino IDE, STM32CubeMX, Keil uVision, and Proteus for development and simulation.
- Improved code modularity and reduced debugging time through structured troubleshooting methods.

EDUCATION

B. Tech – Artificial Intelligence and Machine Learning

CGPA - 8.20

Saveetha School of Engineering, Chennai

[2021-2025]

Diploma – Robotics

92%

Sami Abedananda Polytechnic College

[2020-2021]
